

For Media, Press, & Publicity Inquiries

What follows are some reasons why businesses involved in selling books may want to carry my novel “Legacy of Honor-The Patriarch” and readers/customers will want to purchase the novel:

1. **This is a story about character, courage, honor, friendship, sacrifice, and love.** Stories of this nature are timeless and serve as a reminder of the goodness of people.
2. **A review by Regina Loveridge summarizes the essence of this Novel:** “If the first book in the trilogy, Legacy of Honor by Larry Freeland is an accurate indicator, this series should be read by everyone. If I were still teaching high school, I would recommend this book to my students. The descriptions of fighting in the trenches and the struggles of the soldiers in WWI is amazingly accurate and makes one feel as if he/she can understand what it was like to be there. So much could be learned by anyone reading this book about a war that did not receive the attention lavished on other conflicts. I also appreciated the coverage of the lives of the soldiers after the war. Almost nothing is overlooked with cars, baseball, steel mills, strikes and the bonus army. This journey into the key events of the early 20th century through the eyes of Sam's family and friends is very moving and makes the history come alive to many who may have previously only read the dry historic accounts of so many pivotal events from our past.”
3. **This novel is written as historical fiction and told in first person through the experiences of Sam McCormick a doughboy in WWI.** The reader will travel back in time and experience the horrific nature of WWI, the “War to end all Wars.” Sam will return home with a French bride and attempt to restart his life and assimilate back into society. He’ll find it a difficult process and challenge him in ways he thought he left back on the battlefields of France. If you’re not familiar with “The Bonus Army” or the “Bonus March” on Washington D.C., or the “Little Steel Strikes” of 1937, you’ll want to read this novel and become acquainted with some of the darker history of treatment toward our Veterans.

4. **“Legacy of Honor-The Patriarch” is a must-read for readers who enjoy:**
- Nonstop action, suspense, thrillers, and war books and movies.
 - Understanding the experiences of doughboys/infantrymen during World War I and its aftermath for those who survived.
 - Learning about America’s military history and battles.
 - Books like “*We Were Soldiers Once and Young*” by Harold G. Moore, “*Band of Brothers*” by Stephen E. Ambrose, and series books by Lee Child and Jack Carr.
